'higgs boson

June 3rd, 2020 - the higgs boson is an elementary particle in the standard model of particle physics produced by the quantum excitation of the higgs field one of the fields in particle physics theory it is named after physicist peter higgs who in 1964 along with five other scientists proposed the higgs mechanism to explain why particles have mass this mechanism implies the existence of the higgs boson'

June 2nd, 2020 - i shall argue that particle

physics as practiced since 1930 is a futile

enterprise in its entirety indeed physics

after the groundbreaking findings at the

beginning of the twentieth century has

undergone a paradigmatic change that has

turned it into another science or better a

high tech sport that has little to do with the
